

## **James D Jackson Dentistry Testimonials**

"Having been the President and CEO of a healthcare agency, I cannot help but critique the services that I receive as a patient from other health care providers. I also admit to being a coward when it comes to dentistry. That probably explains my mandatory 5-6 year visits for routine dental procedures whether I need them or not. Subsequent to recommendations from a friend, I scheduled an appointment with Jim Jackson. He changed my entire perspective! I underwent several procedures: from cleaning to fabricating and installing a crown to replace a failed tooth. I NEVER experienced any pain or discomfort! Dr. Jackson was always sensitive to my well-being and fears. Needless to say, his training at the University of Michigan's Dental School equipped him the finest technical skills available. His office staff is friendly, efficient, and competent. Anyone would think that this is a paid advertisement! It isn't!"

- Marsh Wolfe

"When my daughter moved downstate, she transferred her dental records and care to a dentist in Grand Rapids. The dentist told her that after time, fillings and crowns often needed to be replaced due to normal wear, but that her dental work was holding out in spite of the fact that the work was done over 25 years ago and that her dental work was "very well done." He indicated that Dr. Jackson has done "quality work" and her fillings and crown remain in place today.

Personally, I have gone to Dr. Jackson for over 31 years. I don't think of him as just a General Dentist, but as an artist – along the lines of a sculptor. I found that he took great pains, and pride not only to make dental work functional but aesthetically pleasing. He does not worry about chewing and biting surfaces, but how the crown / bridge fits in with the rest of the teeth in terms of size, shape, and color. I have personally witnessed him, and his assistant, discuss options from his "color palette."

I find that his office is well run, and with a positive, caring, and friendly atmosphere.

And you can't beat the office staff!"

- Darlene Alderton

"Dr. Jackson has been my dentist for 25 years. He has seen me through several abscess teeth, crowns, and root canals. Because of all the excellent care he has given me, I still have my teeth. I am not fond of going to the dentist, but he has always made me feel comfortable and safe. A friend is someone who you can always count on, no matter what. Dr. Jackson has not just been my dentist. He is my friend. I truly appreciate all of his professional care."

- Debbie K. Wood

"When I moved to Marquette 10 years ago, I had had some bad experiences with dentists and became very intolerant to pain. My daughter and daughter-in-law suggested that I tried Dr. Jackson. My daughter-in-law was also a patient here. Dr. Jackson was very kind and understanding, and has made treatments nearly completely painless. His staff is very accommodating and pleasant."

- Margaret

"I lived many years self-conscious of the fact that one of my front teeth was discolored. In speaking with Dr. Jim Jackson of Marquette at a social gathering, I brought up the topic of my front tooth and explained what had happened and the various opinions I had been given by others in the dentistry field. Dr. Jackson felt that he had a treatment that would be successful. After a series of treatments, the tooth matched the rest of my teeth beautifully. After years of covering my mouth for fear that someone would notice the discoloration, I was finally able to speak and smile freely with no qualms about what others would see or say regarding my teeth. Dr. Jackson is very conscientious, caring, and professional in his chair-side manner. I would highly recommend him and this treatment to anyone."

- Laurel Ashbrook

"This is a long overdue thank you. These dentures are the very best ones. They are 4 years old, and I still don't have to use polygrip. I wore false teeth for about 40 years, and my bottom ridge is gone, so I consider this amazing."

- Ann L. Jackson

"Dr. Jackson has been our family dentist for many years. One son is a "special needs" person. Because of the excellent staff and their caring and attention, he has had great dental health as all our family has."

- Bruce and Pat Bureau

"We recently relocated back to Marquette after a 9-year absence. We're especially happy to return to our familiar doctors and dentist. While away, we were treated by 2 different dentists and 1 orthodontist. All 3 commented on what outstanding dental work we had received in the past.

Just goes to show you - the quality of your good foundation work proved itself both inside and out. I'm always told what a great smile does to brighten up even the cloudiest days. Keep up the good work Dr. Jackson."

- The Steve Lillie family

"The words "WE CATER TO COWARDS" drew me into Dr. Jackson's office over 30 years ago. My history with dentists had not been a positive one, and there was much work to be done. I'm happy to report that it was done and done well by a friendly, caring staff that always had my comfort in mind. Thanks for today's happy, healthy smile!"
